## Corporate Desktop Shipping

**DigitalShipper CDS**, part of the DigitalShipper Enterprise family of products, is designed for companies who's employees need immediate access to a wide range of shipping options, right from their desktop. DigitalShipper CDS is accessed through a standard web-browser and can be set up to ship, rate shop, and track packages in just minutes!

**DigitalShipper CDS** can be accessed via your company's intranet or remotely over the internet. CDS runs from a central server, giving everyone (with proper access) an enterprise view of shipping data.

**DigitalShipper CDS** offers these benefits and more:

- Allocate shipping costs by department
- Print carrier compliant shipping labels or bar-coded shipping requests from any laser printer
- E-mail recipients their shipment information
- Generate reports by carrier, department, customer, etc from a single database
- Rate shop shipments by service level to select the least-cost carrier
- Pre-process shipments on your desktop and send to the mailroom for final shipment processing
