

Pharmacy Shipping Software

DigitalShipper is essential for connecting your pharmacy to a multi-carrier shipping system. Whether you are shipping pharmaceuticals, prescription refills or medical equipment, DigitalShipper automates the order fulfillment process to increase efficiency, reduce errors, and lower overall freight costs.

DigitalShipper is ideal for Health System (Outpatient) Pharmacies, Retail Independent Pharmacies, and Large Retail Chains that ship with the national carriers – UPS, FedEx, and USPS – as well as regional carriers such as Spee-Dee Delivery, OnTrac, GSO, LSO, and many more. Our PC Postage options with Stamps.com and Endicia provide easy postal shipping at discounted pricing regardless of volume.

DigitalShipper is on-premise software installed on your own server suitable for single or multiple locations. With a SQL Server backend database all shipping data is centralized and easily accessed for reporting purposes. DigitalShipper is an enterprise-wide application that ensures all locations are following the same workflow and business rules for shipping.

DigitalShipper Standard Features:

- **Rate Shopping**
- **Quick Rate Quotes**
- **Customer Preferences**
- **Custom Carrier Modules**
- **Unlimited Users / Workstations**

DigitalShipper supports all the carrier choices that are important for patient satisfaction – home delivery services such as FedEx Home Delivery and USPS Priority Mail, and signature options such as Direct Signature and Adult Signature Required.

With built-in rate shopping capabilities, DigitalShipper can determine the least cost carrier and service based on your negotiated rates. DigitalShipper additionally will only rate shop eligible services based on time in transit information between the ship date and the expected delivery date.

Customized business rules can provide advanced routing and service level optimization to automatically upgrade (Ground to Air) or downgrade (Air to Ground) the selected carrier service in order to get the shipment to the patient on time.

DigitalShipper is an ideal solution for Pharmacies to automate processes and offer customers reliable shipping options
